Flathead Forest Friday Focus: Weeds

Everyone Invited for a Breakfast Chat on Friday, September, 20th

KALISPELL, MONT. – Nearly 30 species of invasive plants, or weeds, can be found on the Flathead National Forest. Each year forest employees strategize when and where to put its resources in the fight against these invaders. The tools used to kill the weeds are constantly changing as botanists consider everything from plant sniffing dogs to plant eating insects. Come chat with us about our efforts.

Forest Botanist Chantelle Delay and others invite you to have breakfast with us (no-host) at the Perkins Restaurant (1390 U.S. 2, Evergreen, Montana) starting at 7:00 AM on Friday, September 20, 2013.

Every other month, the Forest Service will coordinate these no-host breakfast meetings at a local restaurant with the goal of sharing good food, great company, and a little information about what's happening on our National Forest. We hope the event will be a great way to discuss public land management opportunities and challenges that are important to us all.

If you plan to attend or have any questions, please notify Public Affairs Officer Wade Muehlhof at ewmuehlhof@fs.fed.us or (406) 758-5252. Your response allows us to plan accordingly with the restaurant.
